

Save Energy, Save Money!!!

Why Go Green?

"Going green" needn't be an expensive or complicated task. Here is why you should go Green:

- ✓ **Saves you money:**
Lower your electricity and water bills
- ✓ **Comfortable Home:**
Be cool in summer and warm in winter
- ✓ **Increased House Value:**
Every cent you spend will increase the value of your home
- ✓ **Government Incentives:**
Make use of generous government incentives that can cover the entire costs of some products
- ✓ **Free:**
Start today with your free Government funded Energy Saving Assessment
- ✓ **Reduce your carbon output:**
Know that you are doing your part to save the planet

Ask an LC Energy Saving Consultant today on how you can start saving.

WHAT IS THE PROBLEM?

- ✗ **Growing Electricity Prices**
The average yearly home power bill is almost \$1300 and is set to increase dramatically in coming years
- ✗ **Ongoing Droughts:**
Household consumption of water is 191 000L/year with increases in water prices and water restrictions imminent
- ✗ **Lifestyle Changes**
Each household is responsible for over seven tonnes of greenhouse gas emissions annually. You can make a difference.

How Can We Help?

LC Energy offers customers a wide range of services that aid in the implementation of energy saving initiatives that will not only help the environment, but also your back pocket. A Government funded Energy Saver Assessment includes:

- ✓ **Free** Independent Home Sustainability Assessment (HSA) site visit
- ✓ **Free** Report offering recommendations and advice on how to save electricity and water
- ✓ **Free** consultation with a sustainable energy professional to help you choose suitable energy saving products from a range of different companies
- ✓ **Access to** a four year **Interest Free** government Green Loan of up to \$10 000 for energy efficient products

What Will You Save?

Below is a list of some products as well as the potential savings to be made:

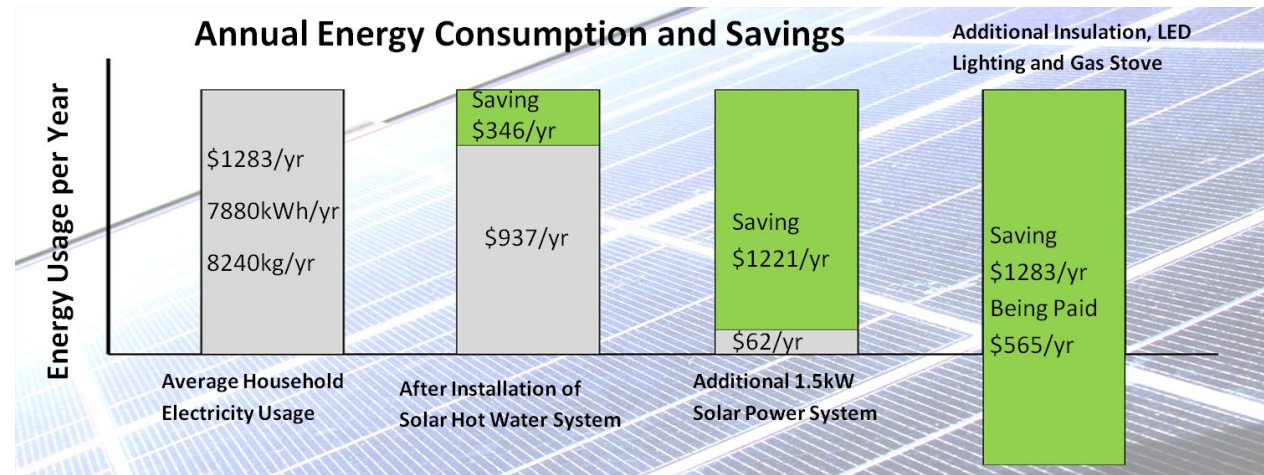

- ✓ 1-10kW Grid connect Solar Power systems
e.g. 1.5kW system - **\$1,200/year**

- ✓ Solar Hot water system (\$1,600 rebate) - **\$346/year**
- ✓ Replacing inefficient Incandescent Globes with Energy Efficient Lighting - **\$82/year**
- ✓ Installing Insulation (\$1200 rebate) in the ceiling of your home - **\$289/year**

NOTE: Most products have additional price reductions thanks to the Solar Credit Scheme

Call your Energy Saver Assessor TODAY:

... or simply feel free to contact us to have any energy questions answered or if you would like information on any energy or water products or services that we provide.

Company Background

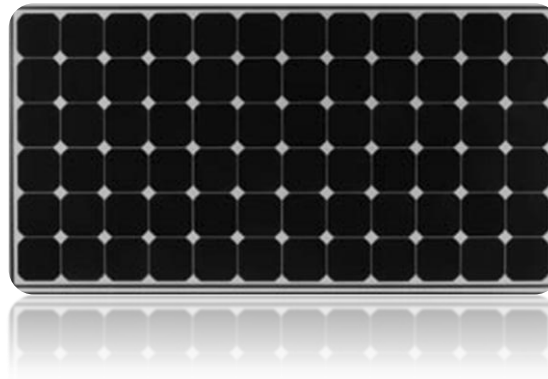

For 20 years, Brisbane based LC has been providing consulting in mechanical engineering design, analysis and testing to a variety of clients and industry sectors. LC has been growing its green energy division known as LC Energy, since early 2006.

LC Energy has alliances with renowned green energy product manufacturers and provides consulting services to many industry sectors as well as all levels of Government.

LC's head office is located at the Goodna Technology Park, officially opened in October 2008, overlooking the Brisbane River.

LC has other offices in Dalby and Johannesburg.
